About This Game

Off Grid is a 3rd person stealth hacking game where data is your most powerful weapon. Off Grid forgoes combat for hacking tools and ingenuity, and is completely moddable.

Gameplay utilises unique mechanics that allow you to manipulate the world and people around you with the data they unwittingly leave behind. It's a stealth game where the player can truly hack and manipulate objects in the environment.

Players, modders, and hackers will be able to use the game to create new and interesting levels with stories about surveillance, hacking and the internet of things.

Features:

- Stealth and hacking gameplay based on use of data and environments rather than weapons and combat
- Hack into lifelike simulated networks and data with realistic hacking techniques and tools including SSH, sidejacking, and social engineering of the AI
- Contemporary storyline and missions related to real-world events surrounding data privacy and mass surveillance

-
- Fully moddable content encouraging players to create new and interesting levels, whether complete fantasy or mimicking hacking in the real world around them
 - Outstanding audio and original soundtrack from Jonas Jensen and Lyndon Holland, the BAFTA-winning composer from the game Virginia
